

Chortitza Mennonite Settlement Census for November 1811

State Archives of Dnipro Region (DADO)

Fond 134, Opis 1, Delo 316

Translation and comments by Richard D. Thiessen

The following census lists Mennonites living in the Chortitza Mennonite Settlement in November 1811. It serves as a companion to the May 1811 census for Chortitza.

The spelling of names appearing in this translation follows commonly used spellings of today and not necessarily as found in the original. The name Justina was seldom used in this census. Instead, Christina is used, and that has been retained. Likewise, the spelling of surnames also follows the most commonly used spellings of today and not as found in the original.

In the May 1811 census, the recorders often gave an individual's age in half-year increments; for example, someone would be 27^{1/2}, not 27 or 28. The age of infants under one year of age in the May 1811 census was often recorded in fractions of a year, or the number of months, or even the number of weeks. This is not the case with the November 1811 census. Infants are given the age of 1 regardless of when they were born within the year.

When comparing the May and November 1811 census lists, it is apparent that the recorders did not update ages for the population in some villages, including Rosenthal, Burwalde, Nieder Chortitza, Schoenwiese, Insel Chortitz, Einlage, Kronsweide, Neuenburg, and Neuendorf. Ages for the population of the villages of Chortitza, Schoenhorst, and Kronsthal appear to have all been updated, with just a few exceptions. Also, there are twelve additional families listed as landless in Einlage that do not appear in the May 1811 census.

Please note that the surname was not recorded for most children, including a wife's children from a previous husband. Today we would classify these children as stepchildren of the head of the household, but this was not done in the censuses of this time. It appears that the only time the term stepson or stepdaughter was used is when both of the child's biological parents had passed away, and either the head of the household or his wife was the surviving spouse of one of that child's biological parents. Attempts have been made to sort out the often complex blended families in many households.

In some instances, single men living with families, along with maids, servants, and foster children, were identified by both their given names and their surnames. However, this is not always the case. As a result, many servants, maids, and foster children cannot be identified with G^RanDMA numbers because only their first names were given. In some cases, servants and maids were children whose parents were still alive but for economic reasons, the children were employed in another household. In other cases, servants and maids were orphans, or a parent was deceased and the surviving parent had remarried and the blended family was not able to accommodate all of the children. Foster children were usually children whose parents have both died. The death of a parent often resulted in dire consequences for the surviving children, especially if the family was landless.

The second last column contains the number in the [G^RanDMA](#) database. G^RanDMA is a reference to the **G**enealogical **R**egistry **and** **D**atabase of **M**ennonite **A**ncestry, version 24-05c, published by Mennonite Genealogy Inc. in May 2024. It should be noted that G^RanDMA numbers can change over time, and so the numbers assigned to the individuals in this file may not remain accurate. Yellow highlighted cells indicate that the individual cannot be identified in the G^RanDMA database at this time.

Printing Note: This document is formatted for 8½ x 14 paper.
