The following are reports on the Molotschna Mennonite Settlement schools made on 1 January 1896 and 1 January 1898 for about 70 schools.

The residence does not necessarily mean the village in which a person lived. Russia had a taxation system which required registration in a particular village. Many Mennonites lived and worked in villages to which they were not registered.

Nr. simply refers to the page number in the original document.

Menn. = Mennonite

Cath. = Catholic

Luth. = Lutheran

Rub. = rubles

Des. = Desiatina (1.09 hectares or 2.7 acres)

Pud = 16.38 kg or 36 pounds

Governorate = Gubernia = province

Ujesd is an administrative district of intermediate size

Wolost/Volost a smaller administrative district.

With/without Exam means that the student completed or did not complete the school year before leaving.
